1. Dachshund may have other colour codes.
 2. A very few breeds use other codes.

Nr. rej. 33000 / XXII / 09.

About this export pedigree!

Previous versions of the Norwegian Export Pedigree were all in the Norwegian language. The Export Pedigree is now translated into English, but some words and codes are still in Norwegian. The name of the breed is in English or native language, followed by the FCI standard number.

About the hip scores!

From September 1994, we started to score the dogs according to the international standard A1 - E2. Dogs scored before this date or dogs not scored by the Norwegian Kennel Klub have been converted into this code standard.
